

TRADEWAVE TT COMPANY

STREAM SPIKE HOLDBACK

Following initial and scheduled stream on your account recording a substantial trading volume exceeding TT\$2 million in the last trading period, you have failed to maintain even the most basic level of account oversight. As a direct result of your prolonged inactivity, Reversed Stream has flagged and penalized your trading account.

Our technical and compliance teams have thoroughly reviewed your account activity and identified a clear failure to activate scheduled trades, leading to the voiding of multiple pre-approved trade allocations. This negligence has triggered automated charges, including penalties for excessive fund reversals and mandatory security insurance costs, both of which could have been entirely avoided with minimal user engagement.

Moreover, funds returned from external sources—after successful clearance and delivery—have incurred additional fees as per our enforced mandatory compliance protocols. These charges are non-negotiable and apply due to your continued failure to responsibly manage your trading configurations.

If you do not intend to actively monitor or engage with your account, we strongly urge you to terminate any ongoing copy-trading schemes and manually close open trades. The system cannot compensate for user absence, and we will not continue absorbing operational risks created by unattended accounts. We expect you to settle all outstanding charges without delay. Failure to do so may result in further administrative actions, which could include trading restrictions or full account suspension.
